🔗 [Portfolio](#)

High-performing Full-Stack Developer and BCA Graduate with a specialized focus on PHP, React, and Python. Expertly architected complex web ecosystems, including the Habibi Airways reservation platform and an enterprise-grade Hotel Management system. Demonstrated professional discipline and technical agility through a 120-hour internship at Thats End Technology, mastering React JS and dynamic UI components. Forward-thinking Prompt Engineer currently deploying Agentic AI frameworks to bridge the gap between backend logic and intuitive user experiences.

🎓 EDUCATION

Bachelor of Computer Applications, Veer Narmad South Gujarat University

2026 | Surat, Gujarat, India

- Core Subjects: Advanced Web Development (PHP, ASP.NET), Database Management Systems (MySQL), Linux Operating Systems, and Software Engineering.

👛 EXPERIENCE

Web Development Intern, Thats End Technology

Oct 2025 – Nov 2025 | Chikhli, Navsari, Gujarat

- Engineered a functional calculator application using React JS, implementing complex arithmetic logic and a clean, user-friendly interface.
- Developed reusable React components utilizing Props to efficiently pass and render user data (name, email, age, bio) across component hierarchies.
- Architected a dynamic product UI by mapping structured arrays to components, ensuring a professional look through advanced CSS styling.
- Built a responsive image slider and personal profile cards using HTML, CSS, and JavaScript, incorporating smooth transitions and mobile-first layout principles.
- Successfully completed a 120-hour intensive training program with a Very Good performance rating, demonstrating a professional approach to full-stack development tasks.

SKILLS

Languages

PHP, Python (Py), JavaScript (ES6+), HTML5, CSS3

Frontend

React JS, Tailwind CSS, Responsive Web Design

Backend

Node.js, REST APIs, CRUD Operations

Databases

MySQL (Relational Design), Firebase, MongoDB

Architecture

Role-Based Access Control (RBAC), Component-Based Architecture

State Management

Props, Hooks, Dynamic Data Mapping

AI Development

Prompt Engineering, LLM Integration, Agentic AI Workflows

Developer Tools

Git/GitHub, VS Code, Linux, Web Hosting

PROJECT

Agentic AI Personal Assistant, Research & Development

Mar 2026 – Present

- [Live Website](#) 
- Developing an intelligent assistant using Python focused on task automation and natural language processing.
- Applying advanced Prompt Engineering techniques to optimize model performance and agentic decision-making.
- Integrating various APIs to allow the assistant to manage schedules and interact with external web services.

Airline Management System (Habibi Airways), Personal Project

Oct 2025 – Apr 2026

- [Live Website](#) 
- Developed a comprehensive airline travel platform using React for managing flight search, booking, and user accounts.
- Architected a Firebase database to handle complex relational data for flight schedules, passenger manifests, and real-time seat availability.
- Implemented an automated system for generating and downloading boarding passes (PDFs) and digital check-ins.
- Built a secure Admin Dashboard to manage airline operations, pricing, and customer database management

Hotel Management & Review System, Personal Project

Aug 2025 – Feb 2026

- [Live Website](#) 
- Engineered a full-stack hospitality application featuring an automated room booking engine and reservation tracking.
- Integrated Role-Based Access Control (RBAC) to provide separate portals for Guests, Staff, and Administrators.
- Designed and implemented a real-time customer review and rating module using MySQL.

- Developed an availability algorithm to prevent double-booking and automate room status management.

COURSEWORK

Python Programming & AI Research, Self-Directed

2026 – 2026

- Developed an Agentic AI Assistant (Jarvis) by integrating LLMs and optimizing reasoning through advanced prompt design.

Advanced Web Development (PHP & React), College of Applied Sciences and Professional Studies (CASPS)

2025 – 2025

- Engineered complex web ecosystems including an Airline Reservation system and Hotel Management platform using PHP and React.

Database Management Systems (DBMS), CASPS, VNSGU

2024 – 2024

- Architected MySQL schemas for managing large-scale passenger manifests, room availability, and role-based access control.
